

Performance – Constrained Load Factors

This report tracks what percentage of time a particular resource (e.g. CPU, paged memory, non-paged memory) is the most constrained resource on a particular server for the given reporting time period.

Filter Applied: None

Computer	Most Constrained Load Factor	% of Time Constrained
2008X64R2	Available Memory Pages	100.00%
DORIAN200864	Available Memory Pages	100.00%
	CPU Usage	0.00%
HYVWIN8EX64	Available Memory Pages	100.00%
RIMSKY	Available Memory Pages	60.33%
	Paged Pool Memory	39.66%
	CPU Usage	0.00%
WIN2012R2	Available Memory Pages	100.00%
WIN7EX86	Available Memory Pages	94.07%
	CPU Usage	5.93%
