

Network – RDP Latency By Session Per Server

This report displays detailed information regarding RDP latency for each user session connected to one or more servers for a particular time period, as determined by RemoteFX. Use this report to see if only certain users or all users are experiencing connection difficulties on a particular server. **NOTE 1:** Only Remote Desktop Protocol Version 8 (e.g. Windows 8, Windows Server 2012) or greater sessions will be profiled.

Filter Applied: Quick Date Filter

Filter Date Range: From 8/24/2015 12:00:06 PM to 8/25/2015 12:00:06 AM

Server	Average Latency (ms)
XDWIN2012	6ms Average
